ABOUT ME

Computer Science Engineering graduate with a solid foundation in programming, software development, algorithms, data structures and AI. With experience in full-stack software development and agile methodologies. Always willing to learn new technologies and ways of working. Seeking for a job opportunity where I can apply my knwoledge and my abilities in a professional environment.

EDUCATION

Computer Science Engineering Bachelor´s Degree Universidad Complutense de Madrid 2022 – 2026

Computer Science and Information Technology (mobility) Łódź University of Technology 2024 – 2025

EXPERIENCE

- **Internship – DavantAI – MVP in Digital Health**
  Role: Full-Stack Developer
  - Development of a user-oriented web app, based on independent Docker services communicated through API REST.
  - Backend: FastAPI (Python) with service-repository pattern, SQLAlchemy + Alembic, PostgreSQL, JWT Authentication (access/refresh), Pydantic validation, programmed tasks (APScheduler) and integrations (email with Resend).
  - Frontend: React + TypeScript (Vite), TailwindCSS + shadcn/ui, React Router, API integration and consumption with Axios and data visualization (Recharts).

PROJECTS

- **AWS University Engagement Program –** Mobile app project using React Native, Java Spring Boot, Docker and PostgreSQL (PostGIS).
- **Internet Applications Programming** – Full-stack system with Java Spring Boot, React and Docker.
- **Algorithms and Data Structures** - Iterative and recursive algorithms, backtracking, linear data, tree data structures, maps in C++.
- **Thesis -** C++ / OpenGL simulator to study trajectory tracking and collision avoidance algorithms in multiagent systems.

TECHNOLOGIES

Multilayer architectures, Component based architecture, Independent Docker Services with API REST communication, Version control, JWT Authentication, Endpoint Routes Design and Protection, Centralized error handling systems, Scalable and responsive user interfaces, Relational data models design.

`Tools: React, Typescript, TailwindCSS, Axios | Python, FastAPI, Java, Spring Boot, C, C++ | Docker, Git | PostgreSQL, SQLAlchemy, Alembic, Pydantic.`

STRENGTHS

My international experience has allowed me to improve my ability to adapt to new environments, to communicate effectively and to work with more experienced profiles. Also, the internship in DavantAI has boosted my technical skills, my teamworking abilities and has familiarized me with agile methodologies. I am an organized and planning person who always tries to do his work in a solid, clean and consistent way.
